Improvement Initiatives rationale:
<p>Explain why the school, in consultation with the Senior Education Improvement Leader (SEIL), has selected the above Improvement Initiative/s as a focus for this year. Please make reference to the evaluation of school data, the progress against School Strategic Plan (SSP) goals and targets, and the diagnosis of issues requiring particular attention.</p> <p>Student achievement data is in need of improvement. While a large number of students arrive in Year 7 well below expected levels in both literacy &amp; numeracy, we have not been able to consistently achieve acceptable growth levels between Year 7-9. Low growth is prevalent in approx. 40% of student across all domains, and high growth was recorded in only 17-20% when considering the 7-9 NAPLAN data. Writing in particular has been the main concern. An audit of the school's practices in Excellence in Teaching and Learning FISO Improvement Strategy, places the school in the Evolving stage for most parts.</p> <p>The College appointed a learning partner to plan a Year 7 program in 2016 that is ready to be implemented in 2017. It is an evidence based approach, promotes greater staff collaboration, and is differentiated to meet the wide range of student abilities. There has been a review of the leadership structure and the College has now appointed new Leaders in the areas of Data, Professional Learning &amp; Assessment &amp; Reporting. A literacy and numeracy team has undergone training to implement modules to all staff that promote literacy &amp; numeracy across the curriculum. This work will be ongoing in 2017.</p> <p>School Climate and Leadership figures in the Staff Survey are low and reflect a lack of consultation and clarity resulting in low morale. In fact only 30% of staff endorse the school climate and identify leadership as one of the main reasons. Distributive leadership has not always been successfully developed and needs to be expanded. The leadership of teaching and learning needs to be broadened so that there is greater sharing of that responsibility. The Year 11 and 12 program is sound and provides a broad offering in VCE, VCAL &amp; VET. VCAL &amp; VET completion rates are strong but VCE results have not improved in recent years.</p> <p>The pathways program has been reviewed with several clear recommendations that should be implemented from 2017. The current sub-school structure has been problematic in Year 10 and impacted on retention and success rates. The curriculum from Years 7 to 10 has not had sufficient emphasis on the development of students' skills and access to a balanced program. Changes in our VET partnership arrangements for 2017 present an opportunity to discuss the most effective timetable to deliver the school program. Attendance is still a focus and the school will continue to implement strategies to improve the rates of attendance.</p> <p>The school has a strong well-being program and data supports the fact that students generally like coming to school. SATs data has all measures except student behaviour in the fourth quartile which is well above state averages. The Pastoral Care Program is seen as one of the reasons why student well-being is so healthy, and this was reinforced in the Peer Review which recommended expanding the Pastoral Care Program into Year 10 alongside a change to the sub-</p>

school structure. The strong focus on improved learning & teaching should see also see improved student voice and students taking greater responsibility for their own learning.

**Key improvement strategies (KIS)**

List the Key improvement strategies that enable the implementation of each Improvement Initiative. This could include existing strategies already being implemented as well as new ones identified through analysis of data, evaluation of impact of prior efforts, measurement of progress against targets and the diagnosis of issues requiring particular attention. KIS may be specific to one outcome area or applicable across several areas.

## Section 2.1: Improvement Initiatives

Each table below is designed to plan for and monitor each Improvement Initiative. Add or delete tables – one for each Improvement Initiative from Section 1 on the previous page. You can also add or delete rows so that there is alignment and line of sight between the key improvement strategies, actions, success criteria and monitoring. The goals come directly from your School Strategic Plan (SSP) – you will find it helpful to keep them in the same order.

Please note that, in the progress status section, ● ● ● respectively indicate: ● not commenced or severely behind schedule, ● slightly behind schedule but remediation strategies are in place to get back on schedule and ● on schedule and/or completed.

**Confidential cohorts analysis**

Triangulated data used to identify those students who are well below expected literacy levels. A learning enhancement leader has been appointed to lead a team of 5 teachers to deliver intervention programs to the selected students. Each student has a learning enhancement plan and this is used to tailor the type of intervention that is required.

Rigorous testing will occur in 5 week blocks of instruction to monitor progress and learning growth and assess the effectiveness of the instruction. Data will be available to monitor the effectiveness of the program throughout the year.

**Next Steps:**

#### Section 4: Annual Self-Evaluation

[**Drafting Note** Annual self-evaluation section enables schools to continuously collect, monitor and analyse school data about all aspects of school performance. This ensures that all aspects of school performance are considered throughout the year and that any risks, issues and opportunities are identified as they emerge. The Annual self-evaluation against the Continua of Practice should be completed as data becomes available]
